Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 11-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has amended claim 11 by replacing the word (determining), previously set forth as "utilizing" with the word "controlling", however the specification as originally filed only refers to "utilizing a model reference control technique", page 4, lines 11-13 and not controlling a model reference control technique after as initialization of said hard disk drive. Claims 12-18 inherit the language of claim 11.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 11-13 and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki et al. in view of Moon.

Art Unit: 2651

The specifics of this rejection are incorporated herein from paragraph 5 of the previous office action mailed 12/3/04. The changing to the word "controlling" is given the same basic meaning as "utilizing" and "determining" previously claimed.

3. Claims 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki et al. and Moon as applied to claims 11-13 and 16-18 above, and further in view of Official notice. The specifics of this rejection are incorporated herein from paragraph 6 of the previous office action mailed 12/3/04.

Response to Arguments

4. Applicant's arguments filed 3/16/05 have been fully considered but they are not persuasive. As mentioned previously, when Moons system enters a real time control mode in which the system responds to desired new track information by generating anticipatory, i.e. feed forward (Moon, col 14, lines 40-46) control signals to generate digital positioning signals, the control technique is not complete/known until the feed forward signals are generated, which is after initialization of the disk drive.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

Art Unit: 2651

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
